

## Highways Group Report – November 2025

Flooding has re-emerged as a problem in recent weeks – Royden Lane has been particularly affected – and the group have flagged this with HCC who have indicated that they have scheduled work there.

Road surface repairs (patching only) on Pilley Hill (and others), where potholes were reported and marked up in September, have been postponed a number of times in recent weeks, following the emergency repair-work undertaken by Southern Water in Boldre Lane. This work has significantly over-run earlier expectations but is finally complete. The patching repair-work on Pilley Hill has now been scheduled for 10 November ..... - we'll see.

Work on F502 (Solent Way) footbridge in Pylewell Park has been completed, so the footpath has re-opened.

Volunteers working with HCC Countryside Services returned to complete the work on F33 (Church Lane to Rodlease Lane) on November 5<sup>th</sup>. The work is a vast improvement and hopefully will last.

The handrail has been replaced, new drainage and surfacing installed. Steps at the entrance way have been repaired and secured.

BPC have been contacted about the condition of F11 (Pilley Hill to Warborne Lane) It appears this footpath is being damaged by motor vehicles accessing the pony paddocks alongside the path. This land was recently for sale.

## Tree Applications – November 2025

25/01245CONS      Fell 1 x Yew tree      Corner House, CHURCH LANE, Pilley, LYMINGTON, SO41 5QL  
Small garden
